- Stores record information*

4-CHANNEL

Model	430
Capacity (hours)	3000

8-CHANNEL

Model	830
Capacity (hours)	3000

QUALITY & PERFORMANCE

With KDTR, you can keep track of all calls (incoming and outgoing) in terms of their phone numbers and caller IDs, time stamps of each call, and actual phone conversations.

KDTR provides high quality sound messages with play, pause, forward, and rewind functionality, and it can record up to 3000 hours of telephone conversations.

KDTR works independently to record all calls. When you want to access or manage the messages recorded on the device, simply plug in the USB cable (along with KDTR) to your PC and run the management software.

KDTR is very easy to operate and user friendly. You can select, sort, search, play and print out all recorded phone calls.

Mass storage + Micro electronics + Embedded system

Features:

- Easy to install
- Time stamping for incoming* and outgoing calls, storing the phone numbers, length of the phone call and other information digitally.
- Superior voice-recording quality with play, rewind, pause and fast-forward functionality.
- External or Internal power supply.(differs by model)
- Up to 3000 hours recording time for two-way telephone conversations up to 8 channels.
- Unlimited repeat recording time. When KDTR reaches the maximum recording time, the latest recordings will automatically overwrite the oldest recordings.
- Management software compatible with Windows 98, ME, 2000, and XP.
- Easy retrieving and searching of recorded information by date, time and telephone number* on PC.
- Password security.
- Software program for downloading recordings to a WAVE file for easy sharing of information with clients or colleagues and for creating backups.
- Weighing 750g and measuring only 23.5 cm (H) x 18 cm (W) x 5 cm (D).

*Requires Caller ID service on the subscriber line for caller ID function.
